Name/Title (Caption as shown on agenda): Tires and Tire Services 6100001879 JF	
Brief Description of Item(s) and Use: This contract will provide the City of San Antonio with the purchase of tires and tire services that will support the City's fleet of approximately 5000 units. The categories for this consolidating contract consist of the following type tires: passenger (police pursuit tires included), turf, truck & industrial, emergency and heavy equipment. This contract will provide approximately 24,000 tires annually and will also include tire services such as retreading, road service and repairs. Historically, tires for police units are replaced annually and equate to an average replacement of 4,000 tires per year. On an annual basis, approximately 12,000 tires are replaced for tractor trailers (6 to 8 tires per unit), 3,000 tires are replaced for off-road construction units (4 to 6 tires per unit), 2,000 tires are replaced for sedans and light duty trucks (4 tires per unit), and 3,000 tires are replaced for Fire and Aviation units. This bid consolidates 23 different contracts for tires and related services with 9 different vendors into 4 new contracts. This solicitation aggregates City demand to achieve volume discounts as well as decrease administrative costs through the management of fewer contracts. A sampling of City pricing to retail store pricing indicates an average savings of \$31.00 per heavy duty truck tire and \$26.00 per passenger vehicle tire. The contract will supply the City with first line tires that are manufactured to original equipment manufacturer specifications. Experience has shown that first line tires offer higher quality, greater retreadability and the most advanced technology in tire construction.
