Background and Scope

- Professional Storm Water Data Collection and Management Services
- Proposals on providing an inventory of City-maintained underground storm water drainage and related surface infrastructure, to include:
 - Cleaning as needed
 - CCTV inspection of all underground structures
 - Condition assessment
 - Population of attribute information
 - Mapping
 - Integration of data into TCI software systems (PipeLogix and Cartegraph OMS)

This information shall be used to assist City with identifying and prioritizing the maintenance of City's storm water infrastructure.

SBEDA

- Economic Development Department will go over the small business points system and subcontracting goals.
